ALKYGLYCEROLS REFERENCE LIST

MISCELLANEOUS (Occurrence, Absorption, metabolism, biological effects)

**BIO-CHEMISTRY:**

Grosman, N.: *Effects of the ether phospholipid AMG-PC on mast cells are similar to that of the ether lipid AMG but different from that of the analogue hexadecylphosphocholine.* Department of Pharmacology, University of Copenhagen, Den. Immunopharmacology (Netherlands) Jul-Aug, 22 (I) p. 39-47; 1991.

Murphy, M.G., Wright, V., Ackman, R.G., Horackova, M. **Diets enriched in menhaden fish oil, seal oil, or shark liver oil have distinct effects on the lipid and fatty-acid composition of guinea pig heart.** *Mol Cell Biochem.* 177: 257-269, Dec. 1997.

**CANCER:**

Walum, E., Brohult, J., Werner, B.: 
Effect of 1-O(2-methoxy) hexadecyl glycerol on the growth of human neuroblastoma cell and human epithelial cancer cells. 
In manuscript, 1996.

Wang, H.M., Rajagopal, S., Reynolds, S., Jordan, K., and Chakrabarty, S.: 
Differentiation-inducing effect of 1-O (2 methoxy) hexadecyl glycerol in human colon cancer cells. 

Wang, H.M., Rajagopal, S., Reynolds, S., Cederberg, H., and Chakrabarty, S.: 
Differentiation-promoting effect of 1-O (2 methoxy) hexadecyl glycerol in human colon cancer cells. 

Wykle RL, et al.: 
Biosynthesis of an O-alkyl analogue of phosphatidic acid and O-alkylglycerols via O-alkyl ketone intermediates by microsomal enzymes of Ehrlich ascites tumor. 
J Biol Chem, 245: 3047-3058; 1970

Yamamoto N., et al.: 
Activation of mouse peritoneal macrophages by lysophospholipids and ether derivatives of neutral lipids and phospholipids. 

Yamamoto, N., St. Claire, D.A., Homma, S., Ngwenya, B.: 
Activation of mouse macrophages by alkylglycerols, inflammation products of cancerous tissues. 

IMMUNOLOGY:

Adams, D.O., Hamilton, T.A.: 
Molecular bases of signal transduction in macrophage activation induced by IFNY and by second signals. 

Boeryd, B. Nilsson, T., Lindholm, L., Lange, S., et al: 
Stimulation of immune reactivity by methoxysubstituted glycerol ethers incorporated into the feed. 

Bianco, C., Griffin, F.M., Silverstein, S.C.: 
Studies of the macrophage complement receptors. Alteration on receptor function upon macrophage activation. 

Brohult, A., Brohult, J, Brohult, S.: 
Effect of irradiation and alkyloxyglycerol treatment on the formation of antibodies after salmonella vaccination. 

Caldwell, J.E., Sifferd, R.H., Porsche, J.D., Fenger, F.: 
Recent studies on yellow bone marrow extracts. 

Cohn, Z.A.: 
The macrophage - Versatile element of inflammation. 
Harvey Lect, 77:63; 1982.

Das, A.K., Holmes, R.D., Wilson, G.N., Hajra, A.K.: 
Dietary ether lipid incorporation in tissue plasmalogens of humans and rodents. 
Lipids, 27, No. 6, 401-5; 1992.

Goetzl, E.J., Derian, C.K., Tauber, A.I., Valone, F.H.: 
Novel effects of 1-O-hexadecyl-2-acyl-sn-glycero-3-phosphorylcholine mediators on human leukocyte function: delineation of the specific roles of the acyl substituents. 

Gross, P.A., Gould, A.L, Brown, A.E.: 
Effect of cancer chemotherapy on the immune response to influenza virus vaccine. 

RADIATION:

Brohult, A., Holmberg, J.: Alkoxglycerols and Especially Selachyl Alcohol on the Bone Marrow in Connection with Irradiation Treatment and in Leukemia Therapy. Nature 181:1484.

Schumacher, Dubois, et al: *Evaluation of oral administration of Alkyrol on the renewing of the rectal mucous membrane after preoperative irradiation of T2-T3 grade tumors, treated by radio-surgical combination.* A pilot study, Centre Régional de Lutte Contre le cancer Montpellier, France.

**HEAVY METALS:**

Fredin, B.: *Preliminary observations of rapid effects of alkylglycerols on the excretions of mercury in man.* A pilot study, Department of Physiological Chemistry IV University of Lund – Sweden, 1988.
